Exploratory Data Analysis and Visualization

Prof. Joyce Robbins

Extra gentle for the most sensitive skin.

Sensitive skin + sensitive skin, add the chemicals and moisture of a diaper and you have diaper rash.

Baby Wipes's unique high-absorbency natural-blend cotton material provides cotton-soft, extra thick, gel-free protection for your baby's sensitive skin. The chlorine-free materials and absorbent polymers is non-toxic and non-irritating. Clinically tested and pediatrician recommended for babies with allergies and sensitive skin.

Baby Wipes™

Chernoff Faces by WAR

Josh Hamilton	Joey Votto	Albert Pujols	Ryan Zimmerman	
				
Adrian Beltre	Jose Bautista	Evan Longoria	Matt Holliday	Carl Crawford
				
Troy Tulowitzki	Robinson Cano	Miguel Cabrera	Rickie Weeks	Andres Torres
				
Kelly Johnson	Carlos Gonzalez	Aubrey Huff	Shin-Soo Choo	Brett Gardner
				
Brian McCann	Jay Bruce	Adrian Gonzalez	Chase Utley	Stephen Drew
				
Dan Uggla	Joe Mauer	Scott Rolen	Jayson Werth	Jason Heyward
				
Angel Pagan	Daric Barton	Ichiro Suzuki	Chase Headley	Hanley Ramirez
				

2010
top hitters

Albert Pujols

Size of the face—I used wOBA (height of the face), wRC (width of the face) and WAR (general shape of the face) to dictate the size of the face.

Shape of the mouth—Power makes people smile, ask **Jose Bautista**. I used slugging (height), isolated slugging (width) and total home runs (curve of the smile).

Shape of the eyes—Batters who walk a ton need good eyes. Therefore, walk rates (height) and on-base percentage (width) are represented here.

Shape of the hair—I couldn't think of anything here really, but hits (height) and RBI (width) are here. I also made the “style” of the hair set to stolen bases.

Shape of the nose—A general idea about high batting average on balls in play is that they are unsustainable (not in all cases, but let's go with this notion for a second). Thus, if a hitter had a high BABIP, he is lying about his true talent. Higher BABIP, bigger nose (think Pinocchio).

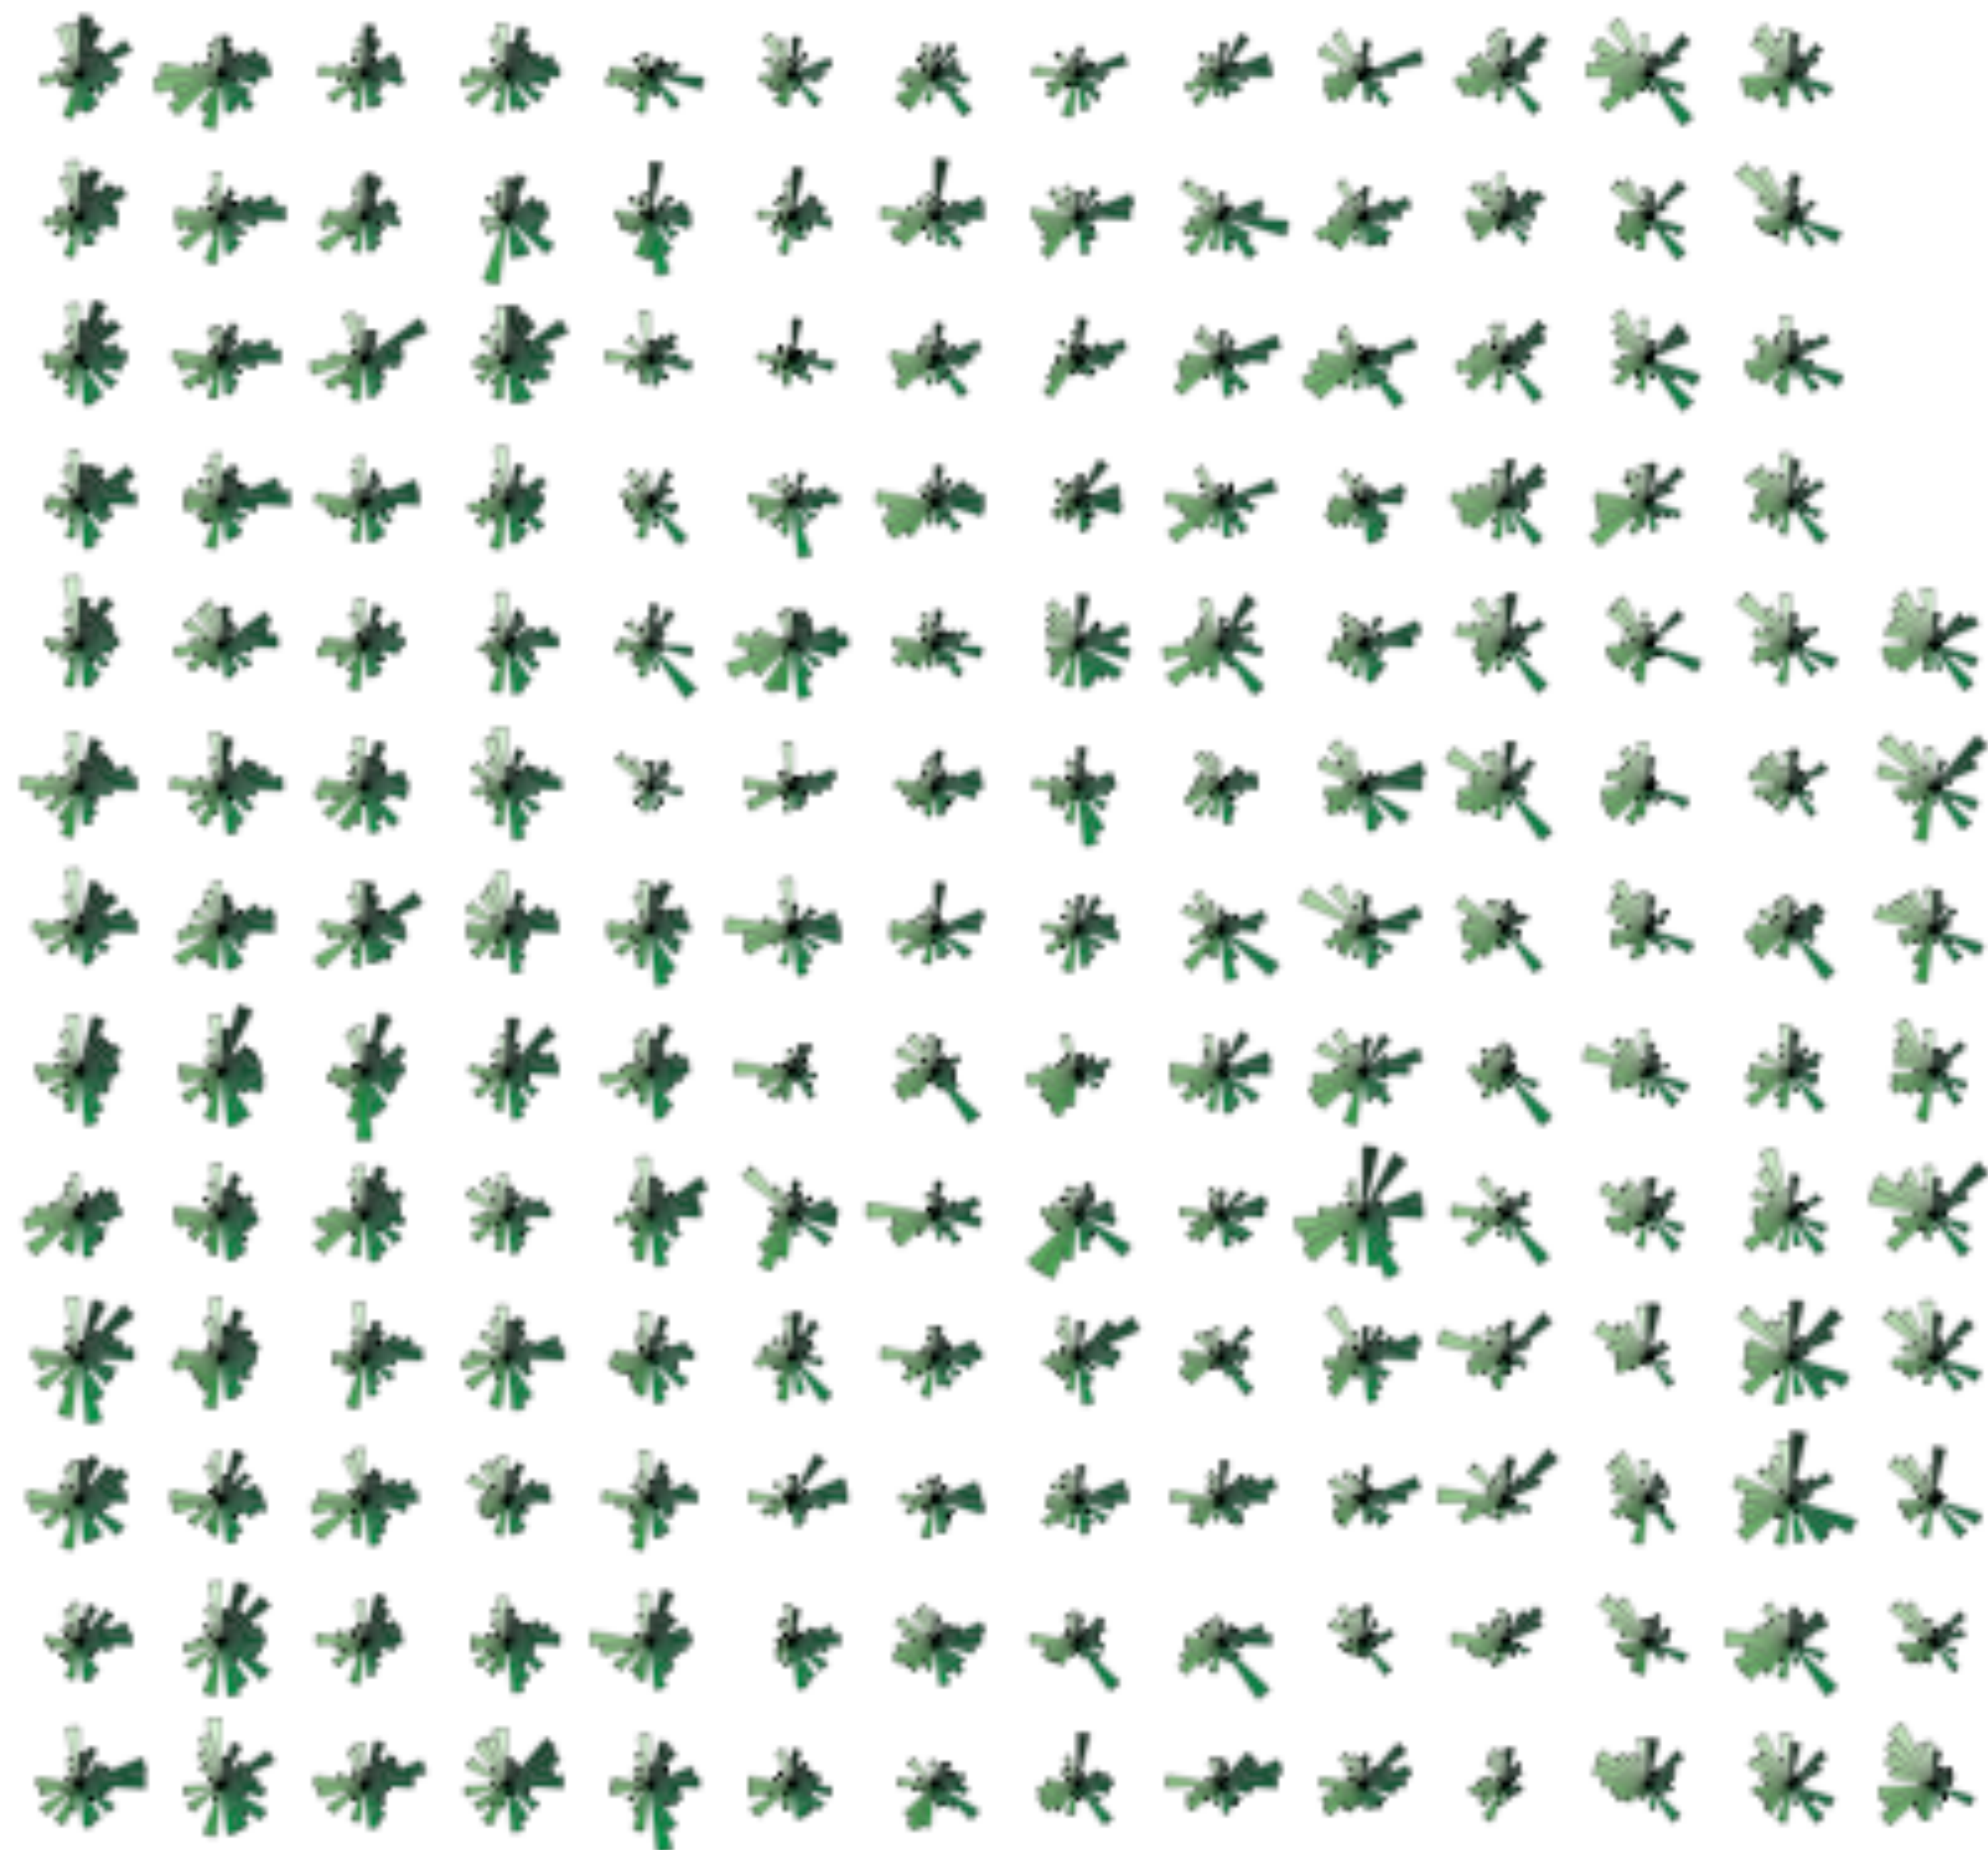

Shape of the ears—Psst...players with high strike out rates have big ears because they love to hear the sound of their bat whiffing.

Perceptually uniform color spaces

- don't blur important distinctions in the data
- don't add distinctions that don't exist in the data

`viridis` package

tl;dr

Use the color scales in this package to make plots that are pretty, better represent your data, easier to read by those with colorblindness, and print well in grey scale.
